Rarely, herpes simplex virus type 2 (HSV-2) may cause primary infection of the oral cavity, typically in association with orogenital sex, but recurrent oral HSV-2 disease is rare.

If we're truly being “real”, I think there’s a group of black people out there who misunderstand white people as much as white people misunderstand them.

If cancerous tissue still remains after such a biopsy, a surgeon will cut away additional tissue from the surrounding area to remove any stray cancer cells.

There is a seven-step gauge for the color intensity of these diamonds, ranging from fair to deep.
